ROLLUPOS APPLICATION USER MANUAL • ADMIN & DEV TOOLS

💎 Sapphire Fiduciary Companion

Private Admin-Only 24/7 Fiduciary Ambient Strategist • Iceberg `[Defend That]` Receipts & Stage-Never-Send Inbox

Version: v2.0.2 | Build Hash: #eea03fb8 | 👑 Admin-Only Cartridge | Auto-Synced: 2026-10-24 22:38

1. ⚡ 60-Second Quickstart Guide

1 **Configure Your Sapphire Endpoint (`⚙️ Settings`)**

Tap `⚙️ Settings` in the top system strip to set your `sapphire_cloud_url` (Cloud Run URL for 24/7 mobile access or `http://127.0.0.1:8085` when tunneling locally).

2 **Set Your Ambient Operating Posture**

Use the top-right mode selector (`🟢 Active`, `🌙 Silent`, or `⛔ Off`) to control whether Sapphire proactively surfaces briefings or queues items quietly in your Staged Inbox.

3 **Chat & Audit Reasoning via `🛡️ Defend That`**

Send concise strategic questions in the mobile stream. Every substantive recommendation carries an Iceberg `🛡️ Defend That` button that reveals full underlying fiduciary receipts on demand.

4 **Review Your Stage-Never-Send Inbox**

Inspect pending drafts and action items prepared by Sapphire—nothing is ever transmitted externally without your explicit review and approval.

2. 🧭 Screen-by-Screen & Navigation Map

SCREEN / TAB / MODAL	WHAT IT CONTROLS & HOW TO USE IT
💎 **Ambient Posture Header**	Live connection telemetry, pending inbox badge count, and 1-tap `Active / Silent / Off` master mode switch.
💬 **Fiduciary Strategy Stream**	Low-noise conversational feed with expandable `🛡️ Defend That` evidentiary receipts.
📥 **Staged Inbox (`Stage, Never Send`)**	Queue of drafted responses and flagged workspace items awaiting human sign-off, plus deep link to Full Slider Studio.
⚙️ **Cartridge Settings Sheet**	Configure Cloud Run / Local endpoint URL, reset local cache, and open this User Manual PDF.

3. 🔬 In-Depth Feature Guide & Workflows

Iceberg Output Pattern (`🛡️ Defend That`)

Keeps mobile replies concise and executive-ready on the surface while preserving deterministic citations, calendar/email context, and trade-off math one tap underneath.

Strict `Stage, Never Send` Safety Boundary

Enforces human-in-the-loop governance: Sapphire prepares drafts in your Staged Inbox and never auto-sends external emails or mutates production records unapproved.

4. ⚙️ Settings, Secret Vault & Multi-User Data Isolation

SETTING KEY	FIELD DESCRIPTION	TYPE	DEFAULT
`sapphire_cloud_url`	Sapphire Cloud Run / Local URL	`text`	`http://127.0.0.1:8085`

🔒 **Storage Namespace Pattern:** `rollup::v1::u::<google-email>::app::sapphire-companion::*`

📦 **Active App Storage Keys:** `__user_config__` (Managed automatically)

🔐 **Private On-Device Vault Secrets:** None required (uses Hub session)

Isolated Per-User Storage (RollupBridge)

5. 🎛️ Live UI Controls Reference & Recent Updates

Interactive Controls Detected in Current Build (`v2.0.2`):

Send

Pro Tips & Best Practices:

- Switch to `🌙 Silent` during deep-focus meetings so Sapphire continues triaging into your Staged Inbox without interruptions.

Recent Cartridge Update Log (Auto-Tracked on Publish):

- `9ac185f` (2026-10-24) — RollupOS Hub & Mini-App sync (2026-10-24 22:19)
