1. ⚡ 60-Second Quickstart Guide

1 **Bind Your Personal Team (`⚙️ Switch Team`)**
Tap `⚙️ Switch Team` in the top system strip to pick any of the 12 Weekend Warriors franchises. Your selection is saved privately to your Google account profile without affecting any other league-mate.

2 **Dial In Your Moneyball vs. Consensus Blend**
Use the interactive Blend Slider (default `60% Moneyball / 40% Expert Consensus`) on your Roster tab to rank starters, flex options, and waiver targets using usage-weighted expected fantasy points.

3 **Lock Your Protected Core (`⭐`) & Test Sandbox Swaps**
Tap the star/lock toggle on untouchable studs so waiver/drop recommendations never suggest cutting your core players, and test lineup swaps safely in your isolated Sandbox.

4 **Track Live Matchups & NFL Game Center**
Open the Matchup tab or tap any game pill in the docked NFL Scoreboard ribbon at the bottom to inspect live play-by-play scoring, win probability swings, and active fantasy starters.

3. 🔬 In-Depth Feature Guide & Workflows

60/40 Moneyball Blend Engine (Full-PPR, 2-FLEX, No Kicker)

Multi-Horizon Opponent Counter-Pick War Room

Scans your current and upcoming opponents' bye weeks and injury designations, flagging high-leverage waiver claims that simultaneously upgrade your bench and block your opponent's weakest starter.

100% Isolated Multi-User Profiles

Every signed-in user gets an isolated `RollupBridge.storage` bucket for their chosen Team ID, Protected Core locks, Watchlist stars, Sandbox roster moves, and private player scouting notes.
