ROLLUPOS APPLICATION USER MANUAL • FIELD & PRODUCTIVITY

📸 Field Snap & Notes

Fast Mobile Photo & Field Note Logger • Hardware Camera Compression, Project Tagging & Instant CSV Export

Version: v1.0.1 | Build Hash: #6ccac518 | 🔒 Per-User Authorized Cartridge | Auto-Synced: 2026-10-24 22:15

1. ⚡ 60-Second Quickstart Guide

1 **Set Your Default Project Tag (`⚙️ Settings`)**
Tap `⚙️ Settings` in the top system strip to configure your default Project / Job Tag (pre-fills automatically on every new note) or type a custom tag per entry.

2 **Snap a Compressed Rear-Camera Photo (`📷`)**
Tap `📷 Snap / Attach Photo` to launch your Android rear camera. RollupBridge automatically resizes (`1280px` max width) and JPEG-compresses (`82%`) images so hundreds of snaps fit comfortably on device.

3 **Log Observation & Save Privately (`💾`)**
Enter a quick field observation and tap `💾 Save Entry`. Entries are stored strictly under your signed-in Google email namespace.

4 **Export Structured CSV (`📤 Export CSV`)**
Tap `📤 Export CSV` at the top right to download a clean spreadsheet of timestamps, project tags, notes, and photo flags.

2. 🧭 Screen-by-Screen & Navigation Map

SCREEN / TAB / MODAL	WHAT IT CONTROLS & HOW TO USE IT
📸 **Capture & Quick Note Card**	Project tag input, multi-line field observation box, live camera thumbnail preview, and 1-tap save.
🗂️ **Isolated Entries Feed**	Chronological timeline of your saved photos and notes with per-item delete (`✕`) controls.
📤 **CSV Exporter &** ⚙️ **Settings**	1-tap CSV report download, default project configuration, and User Manual PDF access.

3. 🔬 In-Depth Feature Guide & Workflows

Client-Side Canvas Photo Compression (`RollupBridge.camera`)

Raw 12MP–50MP phone photos (`5–12 MB` each) would quickly exhaust browser storage quotas. Field Snap compresses captures on-device into crisp `~120–220 KB` JPEGs in milliseconds.

Zero Cross-User Leakage

Two technicians signing into the same shared tablet or their own phones each see only their own `rollup::v1::u::<email>::app::field-snap::entries` bucket.

4. ⚙️ Settings, Secret Vault & Multi-User Data Isolation

SETTING KEY	FIELD DESCRIPTION	TYPE	DEFAULT
`default_project`	Default Project / Job Tag	`text`	`General Sandbox`

🔒 **Storage Namespace Pattern:** `rollup::v1::u::<google-email>::app::field-snap::*`

📦 **Active App Storage Keys:** `entries`

🔐 **Private On-Device Vault Secrets:** None required (uses Hub session)

Isolated Per-User Storage (RollupBridge) **Mobile Camera / Multimodal Capture** **Android Share Sheet & CSV/JSON Export**

5. 🎛️ Live UI Controls Reference & Recent Updates

Interactive Controls Detected in Current Build (`v1.0.1`):

📤 Export CSV 📷 Snap / Attach Photo 💾 Save Entry

Pro Tips & Best Practices:

- Use consistent project prefixes (e.g., `CSC-26-4182`) so exported CSVs sort and pivot cleanly in Excel.

Recent Cartridge Update Log (Auto-Tracked on Publish):

- `22d612c` (2026-10-24) — RollupOS Hub & Mini-App sync (2026-10-24 19:59)
- `75878e4` (2026-10-24) — Initial publish: RollupOS Multi-User Android Hub & Mini-Apps
