RollupOS — Multi-User Android Hub (Live Deployment Guide)

Native Android APK + WebAPK • Google Auth & Admin Switchboard • 5 Active Mini-Apps

🌐 **Live Cloud Hub URL (WebAPK):** `https://andrewnicks-lang.github.io/android-rollup-app/`
📲 **Direct Native Android APK Download:** `https://github.com/andrewnicks-lang/android-rollup-app/releases/latest/download/RollupOS.apk`
🔑 **Default Admin Unlock PIN (Phone Sign-In):** `2309` (customizable inside 🔐 **My Vault**)

1. Two Ways to Install on Your Android Phone (or Share with Testers)

Install Option	How to Install (Takes 15 Seconds)	Best For
Option A: Native Android APK (`RollupOS.apk`)	Open the Direct APK link above on your phone, download `RollupOS.apk`, and tap **Install**. Never needs to be reinstalled when you add new mini-apps!	**Best for You (Admin):** Enables full native Android WebView + mixed-content LAN/Tailscale HTTP calls (so *Gravity Agent Monitor* can reach local PC sidecars directly).
Option B: 1-Tap Chrome WebAPK	Open `https://andrewnicks-lang.github.io/android-rollup-app/` in Android Chrome → tap ⋮ **Menu** → **Add to Home screen / Install App**.	**Best for Friends / League-Mates:** Zero "Install Unknown Apps" prompt—installs straight from Chrome as a fullscreen app icon.

2. Live Catalog Included in Your Published Hub (5 Mini-Apps)

Mini-App	Default Visibility	Highlights
🏈 **The League Pro** (`fantasy-manager`)	Authorized Users + Admin	All 12 *Weekend Warriors (#945552)* teams synced live, dynamic per-user Team Picker, Core Lock, War Room, and Private Watchlist.
🔫 **SHD Build Intelligence** (`shd-div2-intel`)	Authorized Users + Admin	Division 2 Build Solver, 6-Slot Theorycraft Workbench, Countdown Loot Radar, and Expertise 413/500 Mastery Tracker.
🛰️ **Gravity Agent Monitor** (`gravity-agent-monitor`)	Admin Only	Real-time multi-workstation Antigravity telemetry & 2-way prompt dispatch over LAN / Tailscale.
📸 **Field Snap & Notes** (`field-snap`)	Authorized Users + Admin	Camera photo capture, project tagging, isolated per-user storage, and CSV export.
💉 **RollupBridge Inspector** (`bridge-lab`)	Admin Only	Multi-tenant storage namespace & live ACL matrix inspector.

3. Updating Mini-Apps & Authorizing Friends

From Your PC: Edit or drop any mini-app into `d:\_AI\android-rollup-app\apps\` and run `python rollup.py publish`. Every installed phone app receives the update automatically on next launch!
From Your Phone Anywhere: Open 🔐 **My Vault**, paste a GitHub Personal Access Token once, and then any user toggle you flip in 👑 **Admin Mode** → ☁️ **Save & Sync** pushes straight to GitHub live from your phone.
